## Count in steps of 2 from 0 (up to at least 20) and count in steps of 10 from any given 2 -digit number.

- Use the hundred square below to help spot the patterns in numbers when counting. Note that all numbers when counting in 10 's from 0 end in a zero and emphasise the 'ty' when counting aloud. Notice that they all end in the same number when counting in 10 's from any given number (eg, $7,17,27,37 \ldots$...).
- Write the sequence of numbers that you are learning on separate post-its/scraps of paper. Get your child to put the numbers in order, counting the sequence aloud. Try removing a post-it and see if your child can spot the missing number, again by counting aloud to embed the sequence.
- On the Internet : www.ictgames.com/100huntplus10. (for finding 10 more than a number to start counting). http://www.ictgames.com/saucerSorter.html\#top Set the game to count in 2's, get someone to muddle the saucers up - can you reorder them? Get someone to use the Star Bar to cover a number - can you work out what is covered? http://www.ictgames.com/fairyfog2s v2.html a game for counting in 2's. There are plenty of videos on YouTube that demonstrate counting in 10 's starting from 0 and from any given number (search Counting by 10 's).

## Extensions for when you have achieved ALL the skills.

- Practise counting BACKWARDS in steps of 10 from any given 2-digit number ( 87,77 , 67, 57....).
- Learn the facts for the $10 \times$ table and the 2 x table. (To know them ALL by rapid recall in any order).
- Count in steps of 5 from 0 up to at least 50 .
