## Count up to and across 100 from any given number including 0.

- Use the hundred square below to help spot the patterns in numbers when counting. Emphasise the units when counting aloud.
- Cut up a hundred square into strips. Use the strips as a jigsaw puzzle for your child to put in order as a number line. Help them to learn the order of the decades (10, 20, $30,40 \mathrm{etc})$ from 0 to 100.
- When you see a number (on a bus/ door/ food packet) count on from it.
- Count frequently, starting at different numbers, so that your child hears sequences of numbers.
- On the Internet: www.ictgames.com/counting Flip Counter helps the children to see what happens to the numbers as we count up. Whack a Mole allows you to choose your start number to practise counting on in ones. Counting Cars practices counting on from any number up to 100

## Extensions for when you have achieved ALL the skills.

- Practise reading and writing any given number up to 100 (in numerals).
- Practise counting backwards from 20 to 0 . Then with other sequences of numbers within 0 to 100.
- Learn to spell the words for the number names from 0 to 20.
