

## 7.5.20 Shark picture challenge

You will need

- Grey coloured paper/newspaper
- Black paper
- White paper
- Blue paper
- Scissors
- Glue
- Googly eyes (or use black and white paper for the eyes!)

If you don't have the colours of paper above, please use any that you can find. The black and white mouth is probably the most important part of this project.

Start by drawing a 'shark' shape (see pictures) on the grey paper and cut it out.

Now draw a mouth shape on the black paper, cut it out and stick it on your shark. (you could use a black felt tip pen if you don't have black paper)

Cut out white triangles for teeth and stick them on.

Add eyes to your shark.

Finish by sticking the shark on to blue paper and add some waves for a sea effect!

Enjoy!
