

13.5.20 Cardboard Village Challenge

For those of you who are missing a bit of "junk modelling" in your lives!

Today's challenge is about using recyclable materials to make your own little village at home.

Sort through your recycling for different cardboard boxes/tubes etc. You will need tape/glue.

Use pens, paper or any other resources that you have to decorate your village.

Here are a few ideas, although I am sure you will have lots of good ones of your own!

Please send any photos to school to share.

Enjoy!
