

22.5.20 Planet Challenge

Yesterday I decided that today's challenge was going to be about learning something new!

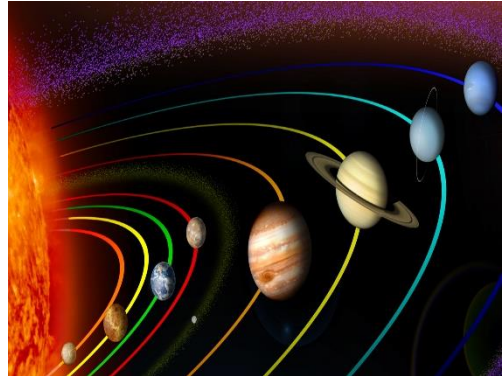

I have NEVER been able to name all the planets in order! So, I spent some time in the afternoon finding different methods to learn them... and I think I have it sorted!

I listened to songs, [watched videos](#) and learnt a rhyme to help me.

Can you name and order the planets? Do you know which one is biggest/smallest? Which one is nearest to the sun?

Perhaps, if you can already answer those questions you could find out a fact that you didn't know before? Or learn something completely new? Or make up your own rhyme?

Enjoy!
